## Hi Lost Mountain Parents and Students.

BACK TO SCHOOL

As you have heard, Superintendent Ragsdale has announced a start date for Cobb's Phased Model for face to face. As it stands right now, Middle School students will be returning on Monday, October 19th.

I would like to take this opportunity to address the

parents with students that have health concerns which require physician signed care plans and medications to be kept in the school for their health and safety—mainly students with <u>food allergies</u> that require an epipen and/or an antihistamine, students with <u>asthma</u> that require an inhaler, students with <u>diabetes</u>, and students with <u>seizures</u>. If you have not done so already, please take the time to visit my website, print the forms related to your child's health concern, have them filled out and signed by your physician and faxed or emailed to me. This will help get

us up and running quicker once we are back face to face.

Medications are to remain at home until we are back in school. Due to the Corona virus, our medication drop off system has changed. I will send out more information as

our start date gets closer.

Click below on the health concern that relates to your student which will take you directly to the forms you will need:

Food Allergy
Asthma
Diabetes
Seizures

Feel free to email me with any questions or concerns

Muna.Calvert@cobbk12.org
